City Directory Reports

1.0 INTRODUCTION

Golder Associates Ltd. (“Golder”) was retained by LGL Limited (“LGL”) on behalf of Parsons Corporation (“Parsons”) and the Ministry of Transportation (“MTO”) to carry out a Contamination Overview Study relating to contaminated lands and waste management for an approximately 43 km section of the proposed 407 Transitway from west of Brant Street (Halton Region) to west of Hurontario Street (Peel Region), generally in Halton and Peel Regions (i.e. the “study area”). The study area is also located directly adjacent to, and/or extends into the City of Burlington, the Town of Oakville, the Town of Milton, the Town of Halton Hills, the City of Mississauga, and the City of Brampton. The study area and limits are shown on Figure 1 in Appendix A.

This study involves the Transit Project Assessment Process (TPAP) for the 407 Transitway and will follow the requirements prescribed in *Ontario Regulation 231/08, Transit Projects and Metrolinx Undertakings* under the *Environmental Assessment Act*. The 407 Transitway will be a two-lane, fully grade separated transit facility on an exclusive right-of-way, running along the Highway 407 Corridor. This section of the transitway facility will consist of 43 km of runningway and a number of stations. The station layouts will include vehicular and pedestrian access(es), park and ride and pick-up/drop off (PPUDO) facilities, bus lay-by facilities, on street integration with local transit, shelters, buildings and other amenities. The transitway and the stations will initially be designed to support a two-lane busway service with provisions for future conversion to a two-track light-rail transit technology.

The purpose of this Contamination Overview Study was to identify, in a preliminary fashion, potential subsurface chemical contamination issues associated with the study area which are obvious from available sources of information. No soil, water, liquid, gas, product or chemical sampling and testing on, or in the vicinity of, the study area was conducted as part of this assessment. This assessment included a cursory overview of the study area and of the neighbouring land use and does not constitute a complete assessment of these lands. Several of the properties within the study area have a history of development and there may be issues of potential environmental concern associated with these properties that were not evident based on the level of assessment of our scope of work.

2.0 METHOD OF INVESTIGATION

Information reviewed and agencies contacted as part of the Contamination Overview Study consisted of the following:

- LGI Copy Services Canada for city directory searches;
- Records on file at the City of Burlington;
- Records on file at the Town of Oakville;
- Records on file at the Town of Milton;
- Records on file at the Town of Halton Hills;
- Records on file at the City of Mississauga;
- Records on file at the City of Brampton;
- Records on file at the Halton Region;
- An EcoLog ERIS Report;

- Aerial photographs, online interactive mapping, topographic and geologic mapping; and,
- A field investigation.

Field work at the Site was carried out on November 16 and 17, 2017 and July 9, 2018. Field work consisted of a drive-by visual reconnaissance of the study area to assess the potential presence of issues of potential environmental concern. On November 16 and 17, 2017, the Brant Street to Winston Churchill Boulevard portion was assessed by Golder. On July 9, 2018, the Winston Churchill Boulevard to Hurontario Street portion was assessed by Golder. Table 1 provides a summary of those properties identified as having issues of potential environmental concern based on the information review. Figures 2 and 3 in Appendix A identify the locations of those properties.

3.0 SCOPE OF WORK

3.1 Information Review

The assessment included a review of available and applicable references concerning site history and subsurface conditions, including the review of an Ecolog report and city directories for the study area. Details of the information reviewed are provided in the following sections of this report.

3.2 Aerial Photographs

Historical aerial photographs, provided from municipal interactive mapping databases and Google Earth™, were reviewed during the completion of the Contamination Overview Study. Based on a review of 2016 Google Earth™ aerial imagery, online interactive aerial mapping for the City of Burlington, the Town of Milton, the Town of Oakville, The Town of Halton Hills, Halton Region, the City of Mississauga, and the City of Brampton, the observed conditions of the study area are as follows:

Brant Street to Dundas Street

West Side

This area is mainly under residential land use.

East Side

This area is developed with a school, with associated sports fields, and residential properties.

Dundas Street to Walkers Line

West Side

This area is mainly under agricultural land use.

East Side

This area is under agricultural land use with disturbed soil for future residential development evident on the west side of Walkers Line, north of Dundas Street. Commercial and retail properties consisting of hotels, grocery stores, small eateries, etc. are present further east, surrounding the intersection of Walkers Line and Dundas Street.

Walkers Line to Appleby Line

Northwest Side

This area is mainly under agricultural land use or is undeveloped and treed. A carpool lot is located northwest of the interchange of Appleby Line and Highway 407.

Southeast Side

The majority of this area is undeveloped with sporadic commercial (Neelands Group Limited, Bos & Co., self storage, and new commercial construction) or institutional (two churches) land use. Residential land use, schools and parkland are located further southeast, across Palladium Way. New commercial construction is also located on the southwest corner of Palladium Way and Appleby Line.

Appleby Line and Tremaine Road

Northwest Side

This area is mainly under agricultural (crops and a horse farm) land use between Appleby Line and the CN Rail line, located 940 m northeast of Appleby Line. Further northwest, between the rail line and Tremaine Road, is a commercial aggregate pit. On the west side of Tremaine Road, north of Highway 407, is a transformer station. A hydro corridor passes across Highway 407 approximately 465 m northeast of the rail line, running north to the transformer station and beyond Tremaine Road.

Southeast Side

The area southeast of the Highway 407 and Appleby Line interchange is under agricultural land use with a pumping station located east of the Highway 407 and Appleby Line interchange. Commercial (Lowes) land use, with vehicle maintenance, is located southeast of the pumping station. The CN rail line crosses over Highway 407 approximately 940 m east of Appleby Line, just north of a storm water management area. The area between the CN rail line and Tremaine Road is under agricultural land use, except for a hydro corridor running north across Highway 407 approximately 465 m northeast of the rail line.

Tremaine Road and Bronte Road (Regional Road 25)

Northwest Side

This area is mostly under agricultural land use. The hydro corridor passes across Tremaine Road approximately 220 m north of Highway 407 and continues to run in a northerly direction out of the study area. A carpool lot is located northwest of the Highway 407 and Bronte Road interchange.

Southeast Side

This area is primarily under agricultural land use with one industrial property (GE) located 840 m southwest of Bronte Road.

Bronte Road (Regional Road 25) to Trafalgar Road

Northwest Side

This area is mostly under agricultural land use, except for a biosolids management facility located approximately 2 km northeast of Bronte Road. Sixteen Mile Creek East flows parallel to the north side of Highway 407 between the biosolids facility and Sixth Line. A golf course is located beyond. A transformer station is located on the west side of Sixth Line, approximately 220 m north of Highway 407. A commercial aggregate pit is located northwest of the Sixth Line and Highway 407 intersection. A carpool lot is located west of the Trafalgar Road and Highway 407 interchange.

Southeast Side

This area is primarily undeveloped or under agricultural land use. Sporadic residential land use is present southeast of the Neyagawa Boulevard and Highway 407 interchange. What appears to be a small wrecking yard, with vehicles and vehicle parts, is present on the northwest side of Burnhamthorpe Road West, approximately 125 m southwest of Neyagawa Boulevard. A carpool lot is located south of the Trafalgar Road and Highway 407 interchange.

Trafalgar Road to Highway 403

Northwest Side

This area is mostly under agricultural land use. The hydro corridor is present parallel to Highway 407, approximately 220 m northwest, which runs to (and beyond) a transformer station located west of the Highway 407 and Highway 403 interchange.

Southeast Side

This area is under agricultural land use.

Highway 403 to Northwest of Britannia Road

Southwest Side

A hydro/utility corridor is present running parallel to Highway 407, approximately 210 m southwest. Another hydro/utility corridor is present running northeast from the transformer station across the interchange.

Northeast Side

A transformer station is present north of the Highway 407 and Highway 403 interchange. Newly constructed commercial properties are developed northwest of the transformer station. A small wrecking yard is evident northwest of East Lower Base Line, north of Highway 407. Agricultural and residential properties are present throughout most of the remainder of the area, except for sporadic commercial properties (Churchill Meadows Animal Hospital and a commercial plaza, including a dry cleaner) along Ninth Line, northwest of East Lower Base Line. A Seven Eleven gas station is located north of the intersection of Ninth Line and Thomas Street. A commercial auto repair/storage facility is located approximately 815 m southeast of Britannia Road. An area of ponded water and creek are present southeast of the Highway 407 and Britannia Road interchange. A commercial landscaping property is present north of the Highway 407 and Britannia Road interchange.

Southeast of Derry Road to Highway 401

Southwest Side

A hydro/utility corridor is present running parallel and adjacent to Highway 407 to the southwest. An industrial property (Union Gas) is located south of the Highway 407 and Derry Road West interchange. A works yard is also located south of the Highway 407 and Derry Road West interchange. The remainder of the area is under agricultural use beneath the hydro/utility corridor.

Northeast Side

A Union Gas industrial property is located east of the Highway 407 and Derry Road West interchange. The remainder of the area is under agricultural land use with residential beyond to the east. Commercial plazas are located at the corner of Ninth Line and Doug Leavens Boulevard and the corner of Derry Road and Lisgar Drive. A Seven Eleven gas station is also located south of the intersection of Derry Road and Lisgar Drive. A rail line crosses beneath Highway 407 approximately 1.2 km southeast of the Highway 401 and Highway 407 interchange. Commercial and industrial properties are evident east of the Highway 407 and Highway 401 interchange (discussed below).

Highway 401 to Winston Churchill Boulevard

North Side

The area is mostly under agricultural land use between Highway 401 and Steeles Avenue and from Highway 407 to 10th Line. East of 10th Line and west of Winston Churchill Boulevard, there are several commercial properties (with trailer storage, possible vehicle maintenance, fill piles, heavy equipment, self storage, RVs and boats) and a communications tower.

South Side

The area is mostly commercial, including a golf driving range, new development, Prologic, DeLonghi Group, IKEA Distribution, TriCan Tire Distributors, Farrow Logistics, and retail shopping outlets. Harvest Bible Church is located on 10th Line.

Winston Churchill Boulevard and Heritage Road/Meadowvale Boulevard

North Side

The area is mostly commercial, including warehouses, and new commercial development.

South Side

A utility corridor runs along the south limit of Highway 407. The area is mostly commercial, including cold storage, multi-tenant office buildings, and Purolator. Some industrial properties are also present in this area.

Heritage Road/Meadowvale Boulevard to West of Mavis Road

North Side

The area is mostly commercial, including offices and warehouses. A gas station and golf course are present northwest of the Mississauga Road and Highway 407 interchange. A school and commercial/industrial properties are located on the east side of Financial Drive.

South Side

The utility corridor is present along the south side of Highway 407 with undeveloped or agricultural land beneath. The area is mostly commercial or industrial land use, including cold storage, multi-tenant office buildings, and Purolator. Some industrial properties are also present in this area. A school is located along Samuelson Crescent between Financial Drive and Derry Road West.

West of Mavis Road to West of Hurontario Street

North Side

This area is mostly residential, except for the Meadowvale Cemetery located west of Mavis Road. A utility corridor crosses Highway 407 approximately 690 m west of Hurontario Street.

South Side

The utility corridor is present along the south side of Highway 407 with agricultural land beneath. Residential land use is present further south. A transformer station is located 140 m south of Highway 407, 430 m west of Hurontario Street. Commercial properties are present along Hurontario, south of Highway 407.

3.3 Regional Geology

Surface geology mapping as presented on the Ontario Geological Survey Release, Geological Series “Surficial Geology of Southern Ontario, Ontario Geological Survey” was reviewed by Golder. Based on the geology mapping, the majority of the Transitway crosses fine-textured Halton till, predominantly consisting of deposits of silt to silty clay.

Based on the MECP Well Records, water wells have been in use historically throughout the study area and given the undeveloped nature of portions of the western limits of the study area, water wells may continue to be in use within the study area. The geology reported in the well records is generally consistent with the published mapping with relatively fine-grained clay and silt deposits typically reported at ground surface. Bedrock (described as shale) was reported at a depth of 1 m below grade in the western portion of the study area, extending to 13.4 m below grade further east and up to 20 m below grade near Highway 407 and Highway 403.

In cases where nearby wells are in the vicinity of the construction area, monitoring of groundwater flow and quality will be conducted to ensure potential sources of contamination do not affect existing wells during construction and operation of the 407 Transitway.

3.4 Existing Land Use

The study area is located generally within the City of Burlington, the Town of Oakville, the Town of Milton, the Town of Halton Hills, City of Brampton and the City of Mississauga. Land use in the vicinity of the study area was observed to be primarily a mix of undeveloped, residential, industrial, commercial and agricultural land use with some open space, parkland and Hydro/Utility and rail corridors. Some properties are expected to have or to historically have had fuel use and/or storage on-site and vehicle or equipment maintenance.

A summary of the significant findings of the field reconnaissance is presented in Table 1. Locations of properties with issues of potential environmental concern are shown on Figures 2 and 3 (Appendix A). Properties described in Table 1 are reported by address.

3.5 Municipal Records Requests

Additional information was requested, via e-mail, from the municipalities located within the current study. At the time of the preparation of this report, no responses from the municipalities had been received. Due to the large volume of properties requiring a records search, Golder recommends that this task be completed on properties where acquisition is required, prior to construction. Freedom of information requests (i.e., MECP) can only be completed on individual properties. Due to the number of properties identified herein, this request should also be completed on properties where acquisition is required.

3.6 Environmental Source Information

Golder contracted EcoLog Environmental Risk Information Services Ltd. (EcoLog ERIS) to conduct a search of environmental sources, including federal, provincial and private sector databases, for information on the study area including 120 m of the transitway. The EcoLog ERIS report is provided in Appendix B.

The databases searches included the following databases: Anderson's Waste Disposal Sites; Certificates of Approval; Environmental Registry; TSSA Commercial Fuel Oil Tanks; Coal Gasification Plants; TSSA Fuel Storage Tanks; National Defence & Canadian Forces Fuel Storage Tanks, Spills, and Waste Disposal Sites; National PCB Inventory; National Pollutant Release Inventory; Ontario Inventory of PCB Storage Sites; Ontario Regulation 347 Waste Receivers Summary; Record of Site Condition; Retail Fuel Storage Tanks; Private and Retail Fuel Storage Tanks; Ontario Spills; Anderson's Storage Tanks; Waste Disposal Sites – MOE CA Inventory; Waste Disposal Sites – MOE 1991 Historical Approval Inventory; Water Well Information Systems, Databases; Boreholes; and the Ontario Regulation 347 Waste Generators Summary.

No noteworthy records were reported for the transitway (i.e., Highway 407).

Noteworthy records reported for the study area included the following:

- A total of 84 boreholes were reported within the study area;
- Six fuel storage tanks (four current and two historical tanks) were reported within the study area;
- A total of 93 waste generators were reported within the study area;
- Two historic incidents were reported with the Technical Standards and Safety Authority (TSSA);

- A total of 47 sites were reported in the pesticide register database;
- Five permits to take water were reported within the study area;
- Two retail fuel storage tanks were reported within the study area;
- A total of 19 spills were reported within the study area; and,
- A total of 98 water wells were reported within the study area.

Relevant information from the Ecolog ERIS report is provided in Table 1 below. A copy of the report is provided in Appendix B.

3.7 City Directories

A review of historical city directories for the years 1959, 1965, 1972/1973, 1977/1978, 1984, 1989, 1994 and 2000 was completed by LGI Copy Services Canada (“LGI”) for the study area and surrounding properties (within 500 m) along Highway 407 for Brampton and Mississauga: Acadian Heights, Adswood Place, Avon Drive, Bakewell Street, Banffshire Court, Barbara Ann Court, Bent Tree Court, Bergamont Road, Bianco Lane, Black Bear Trail, Cailiff Street, Casablanca Circle, Cedar Lake Crescent, Cherrytree Drive, Chinguacousy Road, Clydesdale Circle, Creditview Road, Crimson Court, Derrycrest Drive, Derry Road West, Edmonton Street, Financial Drive, Flaming Oak Court, Gershwin Street, Glamorgan Way, Golden Meadow Court, Grouse Lane, Hallstone Road, Hurontario Street, January Court, Kidlington Gate, Knotty Pine Grove, Lantern Fly Meadow, Lauraglen Crescent, Legendary Circle, Magistrate Terrace, Matisse Place, Mavis Road, McLaughlin Road South, McNutt Street, Meadowlark Drive, Meadowridge Court, Moonstone Court, Oaklea Boulevard, Panhellenic Drive, Ravenswood Drive, Ray Lawson Boulevard, Redpoll Court, Redwood Place, Rockford Run, Rodwell Court, Rollingwood Drive, Rossellini Drive, Saddlecreek Court, Salinger Court, Samson Court, Samuelson Circle, Skranda Hill, Soccavo Crescent, Songsparrow Drive, St. Barbara Boulevard, Stalbridge Avenue, Stockbridge Court, Timberlane Drive, Topflight Drive, Tristan Court, Tumbleweed Trail, Twain Avenue, Wallingford Court, Warhol Way, Waterloo Court, Woodsend Road, Woodside Court, Xaview Court, Zinnia Place and ON-407.

A review of historical city directories for the years 1957/1958/1959, 1965, 1971/1972/1973, 1975/1977/1978, 1984, 1989, 1994, 2000, 2005, and 2011 was completed by LGI Copy Services Canada (“LGI”) for the study area and surrounding properties (within 500 m) along Highway 407 for Burlington, Oakville and Milton: Aldercrest Drive, Allspice Trail, Althorpe Circle, Amber Glen Drive, Angus Walk, Apex Court, Appleby Line, Apricot Street, Arbourview Terrace, Argentia Road, Arvona Place, Astro Court, Autumn Hill Crescent, Avonhurst Drive, Baggins Court, Banff Court, Bansbridge Crescent, Baycroft Drive, Beacham Street, Beechnut Row, Bentrige Road, Berkshire Lane, Berryman Trail, Black Walnut Trail, Blackwood Mews, Bloomington Crescent, Breadfruit Lane, Brinwood Gate, Britannia Road West, Burdette Terrace, Burnhamthorpe Road West, Butternut Crescent, Cabral Gardens, Cactus Gate, Candlelight Drive, Carncastle Gate, Castlegrove Court, Celebration Drive, Chessman Court, Churchill Meadows Boulevard, Clover Ridge Crescent, Coachman Circle, Corinthian Trail, Cork Tree Row, Craighurst Avenue, Credit Avenue, Crimson King Circle, Danbro Crescent, Davemark Court, Deepwood Heights, Deforest Crescent, Densbury Drive, Derry Road West, Dillingwood Drive, Discovery Court, Dolmite Heights, Doug Leavens Boulevard, Doug Wright Drive, Doverwood Drive, Driftwood Drive, Dundas Street, Dunnview Court, East Lower Base Line, Edenwood, Eglinton Avenue West, Eric Centre Boulevard, Everila Road, Farmcole Drive, Ferris Street, Flanagan Court, Folkway Drive, Fontana Court, Fourth Line, Foxwood Avenue, Freeman Terrace, Golden Locust Drive, Gravenstein Road, Graydon Court, Guardian Court, Guelph Line, Guildhall Court, Gumwood Road, Hampden Woods Road, Hazelridge Road, Headon Forest Drive, Hedley

Road, Hemlock Court, Henrietta Way, Hereford Street, Heritage Road, Hiscott Avenue, Honey Locust Trail, Indigo Crescent, Innisdale Road, Intrepid Drive, Irena Avenue, Ironbridge Road, Janice Drive, Jaysnest Court, Jenvic Grove, Keldrew Avenue, Lacman Trail, Lawnhurst Court, Lisanne Court, Lisgar Drive, Longford Drive, Lowville Heights, Macphee Road, Manatee Way, Maple Gate Circle, Marble Gate, Mayla Drive, McDowell Drive, Meadowpine Boulevard, Meadowvale Boulevard, Meteor Court, Mikalda Road, Milkwood Crescent, Minerva Way, Miriam Way, Mississauga Road, Mitchell Drive, Moon Lily (Moonlily) Crescent, Moses Way, Mulligan Crossing, Neyagawa Boulevard, Nightshade Lane, Ninth Line, Oakview Road, Odyssey Drive, Oland Drive, Osprey Boulevard, Palladium Way, Parkgate Drive, Parknoll Court, Partition Road, Pascal Road, Passway Road, Pearlstone Drive, Philip Drive, Platinum Drive, Pondview Way, Pottery Drive, Questman Hollow, Quiet Creek Drive, Raftsman Cove, Raindance Crescent, Rayana Ridge, Ray Lane, Regatta Court, Regional Road 25 (Bronte Road), Rippleton Lane, Roadside Way, Roma Avenue, Rosehurst Drive, Sandcliffe Court, Sandhurst Drive, Sapling Trail, Saratoga Way, Side Road 1, Silverbirch Court, Sixth Line, Skyview Street, Snowy Owl Crescent, Spyglass Crescent, Stardust Drive, Steeplechase Drive, Stoneham Way, Stoneywood Way, Stoneware Road, Swanson Drive, Swordsman Drive, Tacc Drive, Talias Crescent, Tenth Line, Terra Cotta Lane, Terragar Boulevard, Thomas Alton Boulevard, Thomas Street, Tintern Abbey Court, Trafalgar Road, Tremaine Road, Topaz Place, Tufgar Crescent, Walker's Line, Waterfall Crescent, Watergrove Road, Windhaven Drive, Winding Way, Winston Churchill Boulevard, Winterview Court, Woodcroft Crescent, World Series Court, Worthview Place, Yachtsman Crossing, Yarrow Avenue, Zenith Court, and ON-407.

Relevant information from the City Directory search is provided in Table 1 below. A copy of the City Directory review is provided in Appendix C.

4.0 SUMMARY OF FINDINGS

Based on existing land use information obtained from the information collected to date, there are some properties within the study area that would require further environmental investigation to assess the potential presence of subsurface impacts. Figures 1 and 2 in Appendix A identify properties which may have environmental impacts to soil and/or groundwater from current or historical activities based on the assessment to date.

The current occupants of the properties of concern are listed in Table 1. In general, properties currently developed as service garages, gas stations, vehicle sales centres, auto body repair shops, manufacturing facilities, industrial properties, waste management facilities and construction yards represent issues of potential environmental concern and impacts may be encountered during construction activities in the vicinity of these properties. Properties which require further background investigation generally include properties that appear to be vacant or newly occupied, but which had previously been developed for different uses. Agricultural properties with active farming infrastructure (i.e. barns, sheds, livestock pens) within the study area have been identified on Table 1 due to the potential petroleum hydrocarbon, pesticide, and nutrients impacts associated with these operations; however, cultivated fields have not been identified.

If a property is not listed in Table 1, impacts to soil and/or groundwater are not anticipated based on information gathered to date. However, it should be noted that there may be issues of potential environmental concern associated with these properties that were not evident based on the level of assessment carried out as described in this report. Further, the issues of potential environmental concern identified in Table 1 are preliminary in nature and may not include all issues associated with the property. Additional background information (i.e. an EcoLog ERIS database search) is required to better characterize the potential site-specific contaminants of concern.

Should impacts be identified during subsequent phases of work, which are not anticipated based on the evaluation completed above, an assessment will be conducted, and appropriate steps will be taken following the MTO's Environmental Reference for Highway Design.

Of the properties identified in Table 1, the following is a breakdown of recommended additional environmental assessment programs based on information obtained to date.

- Priority Level 1: Properties are anticipated to have subsurface impacts. Additional investigations are recommended should they be included in the study area in the future;
- Priority Level 2: Properties require further assessment to determine whether subsurface investigations would be warranted (i.e., a Phase I ESA is recommended); and,
- Priority Level 3: Properties will require subsurface environmental investigation to determine whether soil and/or groundwater impacts exist at the properties.

Table 1: Property Identification Summary – Preliminary List of Properties with Issues of Potential Environmental Concern

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Property Level I.D. 1	Comments
1	2495 Dundas Street, Burlington	Nelson Flowers and Garden	Pesticides, herbicides	Google Earth™ interactive mapping	2	Possible chemical storage and handling
2	3050 Guelph Line, Burlington	Within Range Golf Centres Inc.	BTEX, PHC F1 to F4, pesticides, herbicides	Google Earth™ interactive mapping, City Directories	2	Possible equipment servicing, chemical and fuel storage and handling
3	3100 Guelph Line, Burlington	Burlington Works Department N 2 in 1984 and Burlington St John Ambulance in 1975-1978	VOCs, PHC F1 to F4, metals, inorganics	City Directories	2	Possible vehicle storage and maintenance
4	3077 Guelph Line, Burlington	A Green Thumb Co.	BTEX, PHC F1 to F4, pesticides, herbicides	Google Earth™ interactive mapping, City Directories	2	Possible equipment servicing, chemical and fuel storage and handling

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Property Level I.D. 1	Comments
5	3095 Dundas Street, Burlington	Beaver Petroleum, First Pioneer Petroleum in 1984, Halton Motor Products in 1984, Ceccarelli B P Service Station in 1975-1978, Wise, Lorne, B P Service Station in 1971-1973	BTEX, PHC F1 to F4	City Directories	2	Possible use and storage of fuel. The property is located immediately west of a proposed station.
6	3075 Flanagan Court, Burlington	Complete Plant Maintenance in 2005	Pesticides, herbicides	City Directories	1	Possible landscaping company – low risk – the business appears to be registered to a house in a residential area, it is likely the yard is located elsewhere
7	3030 Carncastle Gate, Burlington	Zorro Cleaners & Alterations, Sketchley Dry Cleaners in 1994	Halogenated Solvent Use, VOC	Google Earth™ interactive mapping, City Directories	3	Use and storage of halogenated solvents and other chemicals

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Property Level I.D. 1	Comments
8	3124 Sandcliffe Court, Burlington	BonRoy Services Inc.	BTEX, PHC F1 to F4, pesticides, herbicides	Google Earth™ interactive mapping, City Directories	1	Landscaping company – low risk – the business appears to be registered to a house in a residential area, it is likely the yard is located elsewhere
10	3318 Dundas Street, Burlington	Burlington Free Methodist Church, former St Paul's Presbyterian Church	Restricted land use due to the cemetery	Google Earth™ interactive mapping, City Directories,	1	A portion of the property will likely remain inaccessible due to the presence of a cemetery
12	4040-4050 Palladium Way, Burlington	Commercial plaza including Glesgo Dry Cleaners Ltd.	Halogenated Solvent Use, VOC	Google Earth™ interactive mapping, City Directories	3	Use and storage of halogenated solvents and other chemicals
13	4131 Palladium Way, Burlington	Neelands Group Limited	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	Study Area reconnaissance, Google Earth™ interactive mapping	2	Possible environmental impact from on-site industrial processes – refrigeration manufacturing

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Property Level I.D. 1	Comments
20	5222 No. 1 Side Road, Burlington	Iron Horse Equestrian Complex, vehicle and parts storage, fuel use and storage	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	Study Area reconnaissance, Burlington interactive mapping, Google Earth™ interactive mapping	2	Possible environmental impact from on-site fuel use and storage. Possible vehicle maintenance
21	CN Rail line, located 940 m northeast of Appleby Line	Rail line	PHC F1 to F4, BTEX, metals, inorganics, PAHs, VOCs	Study Area reconnaissance, Burlington interactive mapping, Google Earth™ interactive mapping	3	Possible environmental impact from slag used for rail ballast
22	3488 Tremaine Road, Burlington	Hanson Brick Quarry	PHC F1 to F4, BTEX, metals, inorganics, VOCs	Burlington interactive mapping, Study Area reconnaissance, Google Earth™ interactive mapping	3	Possible environmental impact from on-site industrial use, and fuel use and storage

* Preliminary issues based on the level of study carried out. Additional issues may be identified based on subsequent, more detailed, levels of study (Phase I ESA)

¹ 1 Additional investigation is recommended should they be included in the study area in the future

2 Additional background investigations recommended to determine if subsurface environmental investigations are required

3 Additional subsurface environmental investigations recommended

5.0 SUMMARY AND DISCUSSION

Of the properties identified in Table 1 above, the following is a breakdown of recommended additional environmental assessment programs (should these properties require acquisition) based on information obtained to date:

- Level 1: five properties would require further assessment to determine whether subsurface investigations are warranted should they be included in the study area in the future.
- Level 2: forty-six properties would require further assessment to determine whether subsurface investigations are warranted (i.e. a Phase I ESA is recommended).
- Level 3: twenty-five properties would require subsurface environmental investigation to determine whether soil and/or groundwater impacts exist at the properties.
- The following properties are located immediately adjacent to the proposed stations and/or yard/maintenance facilities:
 - 3965 Thomas Street, Mississauga (Risk Level 3);
 - 5591 and 5578 Ninth Line, Mississauga (Risk Level 3);
 - 6000 and 7705 Ninth Line, Mississauga (Risk Level 2);
 - 3155 Argentia Road, Mississauga (Risk Level 2);
 - 1 President's Choice Circle, Brampton (Risk Level 3);
 - 1190 Hallstone Road, Brampton (Risk Level 3); and,
 - 1876 Hallstone Road, Brampton (Risk Level 2).

Several additional industrial properties located along Meadowpine Boulevard, Howe Court, Danbro Crescent, East Danbro Crescent, Meadowvale Boulevard, West Credit Avenue, and Rapistan Court in Mississauga are likely to require additional investigations depending on the final alignment.

Several additional industrial properties located along Edgeware Road, Steeles Avenue West, Hereford Street, and Ironbridge Road in Halton Hills are likely to require additional investigations depending on the final alignment.

Should impacts be identified during subsequent phases of work, which are not anticipated based on the evaluation completed above, an assessment will be conducted, and appropriate steps will be taken following the MTO's Environmental Reference for Highway Design.

Preliminary Site Screenings should be conducted, as per the ERD, for properties requiring acquisition.

6.0 LIMITATIONS AND USE OF REPORT

This report was prepared for the exclusive use of LGL Limited and the MTO. This report is based on preliminary and limited historical information and geological data obtained by Golder as described in this report. This study was completed on a regional scale through a review of existing available information and did not consist of site specific assessments. Additional issues of potential environmental concern may be identified upon completion of site specific Phase I and II Environmental Site Assessments ("ESAs").

This report is not intended to be utilized as supporting documentation for a Record of Site Condition under Ontario Regulation 153/04. If a Record of Site Condition is required for the properties within the study area and this report is to be used as part of the supporting documentation, it must be reviewed and updated by Golder. Additional environmental site assessment activities would be required to comply with Ontario Regulation 153/04.

We accept no responsibility for any deficiency, misstatements or inaccuracies contained in this report as a result of omission, misinterpretations or fraudulent acts of the persons contacted or contained in the information obtained as part of this work. Golder accepts no responsibility for any reduction in property value, either real or perceived, as a result of the reporting of factual information herein.

It should be noted that the results of an investigation of this nature should, in no way, be construed as a warranty that the study area is free from any and all contamination from past or current practices. This assessment was carried out using existing historical information as available from various agencies and no assurance is made regarding the accuracy or completeness of this information. No sampling of soil, groundwater, air emissions or gas was conducted.

If new information is discovered during future work, including excavations, borings or other studies, Golder Associates Ltd. should be requested to re-evaluate the conclusions presented in this report and to provide amendments as required.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Borehole Geology Stratum

Geology Stratum ID:	8504129			Mat Consistency:	Very Dense
Top Depth:	9			Material Moisture:	
Bottom Depth:	10			Material Texture:	
Material Color:	Brown			Non Geo Mat Type:	
Material 1:	Silt			Geologic Formation:	
Material 2:	Clay			Geologic Group:	
Material 3:	Silt			Geologic Period:	
Material 4:				Depositional Gen:	
Gsc Material Description:					
Stratum Description:	Silt and clay becoming uniform silt. Very dense, Brown **Note: Many records provided by the department have a truncated [Stratum Description] field.				
Geology Stratum ID:	8504130			Mat Consistency:	Very Dense
Top Depth:	10			Material Moisture:	Dry
Bottom Depth:	13.5			Material Texture:	
Material Color:	Red-Brown			Non Geo Mat Type:	
Material 1:	Sand			Geologic Formation:	
Material 2:	Silty			Geologic Group:	
Material 3:	Silt			Geologic Period:	
Material 4:	Sandy			Depositional Gen:	glacial
Gsc Material Description:					
Stratum Description:	Silty sand to sandy silt, some gravel, trace clay, dry to wet, nonplastic to low plasticity ML (Glacial Till) Very Dense Reddish brown **Note: Many records provided by the department have a truncated [Stratum Description] field.				
Geology Stratum ID:	8504128			Mat Consistency:	Hard
Top Depth:	0			Material Moisture:	Dry
Bottom Depth:	9			Material Texture:	
Material Color:	Brown			Non Geo Mat Type:	
Material 1:	Silt			Geologic Formation:	
Material 2:	Clayey			Geologic Group:	
Material 3:	Sand			Geologic Period:	
Material 4:	Gravel			Depositional Gen:	glacial
Gsc Material Description:					
Stratum Description:	Heterogeneous mixture of clayey silt and sand some gravel, dry, low plasticity. CL (Glacial till) Hard, brown becoming reddish brown **Note: Many records provided by the department have a truncated [Stratum Description] field.				
Geology Stratum ID:	8504131			Mat Consistency:	
Top Depth:	13.5			Material Moisture:	
Bottom Depth:	16.9			Material Texture:

Borehole Geology Stratum

Geology Stratum ID:	8504811			Mat Consistency:	Very Stiff
Top Depth:	0			Material Moisture:	
Bottom Depth:	2.3			Material Texture:	
Material Color:	Red			Non Geo Mat Type:	
Material 1:	Till			Geologic Formation:	
Material 2:	Silt			Geologic Group:	
Material 3:	Clayey			Geologic Period:	
Material 4:	Sand			Depositional Gen:	
Gsc Material Description:					
Stratum Description:	Heterogeneous mixture of clayey silt, sand and gravel (Glacial Till) Red, very stiff to hard **Note: Many records provided by the department have a truncated [Stratum Description] field.				
Geology Stratum ID:	8504812			Mat Consistency:	
Top Depth:	2.3			Material Moisture:	
Bottom Depth:	6.1			Material Texture:	
Material Color:	Red			Non Geo Mat Type:	
Material 1:	Bedrock			Geologic Formation:	
Material 2:	Shale			Geologic Group:	
Material 3:	Siltstone			Geologic Period:	
Material 4:				Depositional Gen:	
Gsc Material Description:					
Stratum Description:	Weathered to unweathered. Shale bedrock with interbedded siltstone. Red with interbedded grey, weak to very weak **Note: Many records provided by the department have a truncated [Stratum Description] field.

Project Description: Construction of a stormwater management facility consisting of a sediment forebay and an extended detention pond, with a quality control structure outletting to the proposed natural channel and an emergency spillway to discharge excess minor system flows. The new facility will service a total drainage area of 78.55 hectares of land, designed to provide 24 hours detention of the runoff from a 13 millimetre storm event having a permanent storage volume of 2,748 cubic metres and an active storage of 3140 cubic metres complete with a controlled outlet including a 300 mm hickenbottom drain with a 180 millimetre diameter orifice allowing for release to the proposed natural channel.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2018

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2019

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal

CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial

CFOT

List of commercial underground fuel oil tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Note: the Fuels Safety Division does not register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of commercial fuel tanks in the province. The TSSA updates information in its system on an ongoing basis; this listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2019

Compressed Natural Gas Stations:

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Mar 2019

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2019

Certificates of Property Use:

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jul 31, 2019

Drill Hole Database:

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2018

Environmental Activity and Sector Registry:

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jul 30, 2019

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jul 31, 2019

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jul 30, 2019

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Apr 30, 2019

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial [EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2018

List of TSSA Expired Facilities:

Provincial [EXP](#)

List of facilities and tanks - for which there was once a registration - no longer registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed from the ground are included in the expired facilities inventory held by the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-May 2019

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2018

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel storage tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2019

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents:

Provincial

INC

List of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC) and made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2019

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2017

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2018

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2019

Ontario Oil and Gas Wells:

Provincial

OGGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites:

Provincial [OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial [ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jul 31, 2019

Canadian Pulp and Paper:

Private [PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal [PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial [PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Mar 2019

TSSA Pipeline Incidents:

Provincial [PINC](#)

List of pipeline incidents (strikes, leaks, spills) made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of pipeline incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jul 31, 2019

Ontario Regulation 347 Waste Receivers Summary:

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial **RSC**

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2019

Retail Fuel Storage Tanks:

Private **RST**

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2019

Scott's Manufacturing Directory:

Private **SCT**

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial **SPL**

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Feb 2019

Wastewater Discharger Registration Database:

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial **VAR**

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of tank variances in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jul 30, 2019

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
