## 1.0 INTRODUCTION

Golder Associates Ltd. (“Golder”) was retained by LGL Limited (“LGL”) on behalf of Parsons Corporation (“Parsons”) and the Ministry of Transportation (“MTO”) to carry out a Contamination Overview Study relating to contaminated lands and waste management for an approximately 23 km section of the proposed 407 Transitway from west of Hurontario Street to east of Highway 400, generally in the Cities of Brampton and Vaughan, Ontario (i.e. the “study area”). The study area is also located directly adjacent to the City of Mississauga and the City of Toronto and extends slightly within the City of Mississauga and City of Toronto boundaries in a few locations. Seven station sites are proposed including the Hurontario Street Station, Dixie Road Station, Airport Road Station, Goreway Drive Station, Highway 50 Station, Highway 27 Station and Pine Valley Drive Station. The study area and limits as well as the proposed Transitway runningway and station sites are shown on Figures 1 and 2 (Appendix A).

This study involves the Transit Project Assessment Process (“TPAP”) for the 407 Transitway and will follow the requirements prescribed in *Ontario Regulation 231/08, Transit Projects and Metrolinx Undertakings* under the *Environmental Assessment Act*. The 407 Transitway will be a two-lane, fully grade separated transit facility on an exclusive right-of-way, running along the Highway 407 Corridor. This section of the transitway facility will consist of 23 km of runningway and the seven stations noted above. The station layouts will include vehicular and pedestrian access (es), park and ride and passenger pick-up/drop off (“PPUDO”) facilities, bus lay-by facilities, on-street integration with local transit, shelters, buildings and other amenities. Subject to the outcome of the study, the 407 Transitway will be implemented initially as Bus Rapid Transit (“BRT”) with the opportunity to convert to Light Rail Transit (“LRT”) in the future.

The purpose of this Contamination Overview Study was to identify, in a preliminary fashion, potential subsurface chemical contamination issues associated with the study area which are obvious from available sources of information. No soil, water, liquid, gas, product or chemical sampling and testing on, or in the vicinity of, the study area was conducted as part of this assessment. This assessment included a cursory overview of the study area and of the neighbouring land use and does not constitute a complete assessment of these lands. Several of the properties within the study area have a history of development and there may be issues of potential environmental concern associated with these properties that were not evident based on the level of assessment of our scope of work.

## 2.0 METHOD OF INVESTIGATION

Information reviewed and agencies contacted as part of this Contamination Overview Study consist of the following:

- LGI Copy Services Canada for city directory searches;
- Technical Standards Safety Authority (“TSSA”) Fuel and Safety Division Records;
- Records on file at the City of Vaughan;
- Records on file at the City of Brampton;
- Records on file at the City of Mississauga;
- Records on file at the City of Toronto;
- Records on file at the Region of York;
- Records on file at the Region of Peel;

- EcoLog ERIS Report;
- Aerial photographs, topographic and geologic mapping, and;
- A field investigation.

Field work at the Site was performed between September 21 and September 22, 2016.

All field investigations included a drive-by of the area to assess potential presence of an environmental concern.

Table 1 provides a summary of those properties identified as having issues of potential environmental concern based on the information review. Figures 1 and 2 (Appendix A) identify the location of those properties.

## 3.0 SCOPE OF WORK

### 3.1 Information Review

The assessment included a review of available and applicable references concerning site history and subsurface conditions. Details of the information reviewed are provided in the following sections of this report.

### 3.2 Review of Previous Reports

The following previous reports for the study area were provided to Golder;

- Transportation Environmental Study Report for 427 Transitway from Highway 407 to Highway 7. Prepared for the Ontario Ministry of Transportation Central Region, prepared by MMM Group dated March 2015; and,
- Environmental Project Report Hurontario - Main LRT Project. Prepared by Metrolinx and dated June 2014.

Noteworthy environmental findings of the March 2015 Transportation Environmental Study Report included:

- This report covered the area of the 427 Transitway between Highway 7 and 407 ETR;
- The study area lies along the Humber River and Albion River watersheds;
- There are no areas of natural or scientific interest in the study area and no aquatic species at risk;
- No areas of confirmed site contamination were identified in the study area;
- The Hydro One Corridor was identified as having moderate potential for study area contamination; and,
- The location of the 407 Transitway Station, along Codlin Crescent (on-Site), was identified as having a high potential for contamination in several truck/equipment repair/storage facilities and a garden centre.

Noteworthy environmental findings of the June 2014 Environmental Project Report included:

- The study area covered in this report includes the Hurontario Main corridor, Port Credit Go Station, and Downtown Brampton Go Station. The area includes the lands immediately adjacent to Hurontario Street, including a portion of the study area;
- The subject property is located within four watersheds;
- Twenty five sites were identified as previous or current potential environmental concerns for the subject lands including automobile service/repairs and/or dry cleaners;

- The likelihood of encountering contamination at the Site property were reported to depend on the final land takings of the area; and,
- The potential for adverse environmental impacts directly within the HMLRT corridor was reported to be very low.

### 3.3 City Directories

Golder contracted LGI Copy Services Canada (“LGI”) to search available city directories for the study area. The complete search is included in Appendix C. Note that occupants outlined below may not be included in Table 1 as former they were former tenants. The general land use, however, is covered in Table 1. Noteworthy findings are summarized below:

- 7155 Hurontario Street (Property 1, Figure 1) Amerco Rentals, True Value Gas Bar, U-Haul Co. Ltd. were listed as occupants of the property in the 2000 city directory, Dhillon’s Gas Bar was listed in the 1996 directory and XL Gas Bar was listed in the 1991 city directory.
- 33 Topflight Drive (Property 1A, Figure 1) Premium Tire & Auto Centre was listed in the 2000 city directory;
- 7656 Bramalea Road (Property 11, Figure 1) Brampton Bio Conversion Inc. and Peel Resource Recovery were listed as occupants of the property in the 1996 and/or 2000 city directories;
- 7655 Bramalea Road (Property 13, Figure 1) Massiv Die Form has occupied the property since at least 1996, Bramcor Manufacturing, Cosma International Inc. and Fujima International Inc. were listed as occupants of the property in 1991 and Union Carbine Canada was listed at the property in the 1985-86 directory;
- 2645 Steeles Avenue East (Property 21A, Figure 1) Three Bear Esso (2000), Esso Powder [sic] (1996), Airport & Steeles Auto Services and Mandy’s Esso (1991), Bramalea Essa Service (1985-86) were listed as occupants of the property;
- 8001 Goreway Drive (Property 25, Figure 1) Chris Line Transportation System Inc. and Triple M Metals (1980) Inc. were listed as occupants of the property in the 1991 city directory;
- 2010 to 2200 Codlin Crescent/Albion Road (Property 27, Figure 1) Steeles Hub Cap Sales (2103), Rogers’s Truck & Forklift Training (2158), Toronto Truck Driving School (2158) in the 2000 city directory. Steeles Hub Cap Sales was listed at 2103 Albion Road in the 1991 and 1996 city directories (same location);
- 2100 Albion Road (Property 27A, Figure 1) Canada Cartage System Ltd. was listed at the property in the 1985-86 and 1991 city directories; and,
- 7135 Islington Avenue (Property 31, Figure 2) Liftking Inc. and Liftmast Ltd have occupied the property since at least 1991. Mainline Construction Equipment, Town Screw Products were listed at the Site between 1985 and 1996.

### 3.4 City of Vaughan

The Freedom of Information Section of the City of Vaughan was contacted on November 24, 2015 and requested to conduct a review of their files for any environmental information relating to the study area including information on spills, complaints, filling activities, sewer by-law infringements, previous environmental reports and landfills.

At the time of preparation of this summary report, the City of Vaughan had not issued a response to Golder. The City of Vaughan should be contacted following confirmation of property acquisition requirements for specific properties requiring acquisition

### 3.5 City of Brampton

The Freedom of Information Section of the City of Brampton was contacted on November 24, 2015 and requested to conduct a review of their files for any environmental information relating to the study area including information on spills, complaints, filling activities, sewer by-law infringements, previous environmental reports and landfills.

At the time of preparation of this summary report, the City of Brampton had not issued a response to Golder. The City of Brampton should be contacted following confirmation of property acquisition requirements for specific properties requiring acquisition.

### 3.6 City of Mississauga

The Freedom of Information Section of the City of Mississauga was contacted on January 6, 2016 and requested to conduct a review of their files for any environmental information relating to the study area including information on spills, complaints, filling activities, sewer by-law infringements, previous environmental reports and landfills.

At the time of preparation of this summary report, the City of Mississauga had not issued a response to Golder. The City of Mississauga should be contacted following confirmation of property acquisition requirements for specific properties requiring acquisition.

### 3.7 City of Toronto

The Freedom of Information Section of the City of Toronto was contacted on January 6, 2016 and requested to conduct a review of their files for any environmental information relating to the study area including information on spills, complaints, filling activities, sewer by-law infringements, previous environmental reports and landfills.

At the time of preparation of this summary report, the City of Toronto had not issued a response to Golder. However, based on the final preferred alignment, this search is no longer required.

### 3.8 Region of York

The Region of York Environmental Services Division was contacted on November 24, 2015 and requested to conduct a review of their files for any environmental information relating to the study area including information on spills, complaints, filling activities, sewer by-law infringements, previous environmental reports and landfills.

Due to the large number of properties and the significant cost associated with the Region's response (i.e. \$150 per property), the Region of York was contacted for the following limited number of properties, which represented a high probability of the existence of records with the Region of York:

- 6200 Steeles Avenue West;
- 6300 Steeles Avenue West;
- 5690 Steeles Avenue West;
- 100 Galcat Drive; and,
- 200 Galcat Drive.

A written response was received from the Region of York indicating they had no information on file relating to these properties. Notably, these properties are not located within a wellhead protection area, nor in a significant groundwater recharge area.

The Region of York should be contacted again following confirmation of property acquisition requirements for specific properties requiring acquisition, not included in this list.

### 3.9 Region of Peel

The Region of Peel Environmental Services Division was contacted on November 24, 2015 and requested to conduct a review of their files for any environmental information relating to the study area including information on spills, complaints, filling activities, sewer by-law infringements, previous environmental reports and landfills.

At the time of preparation of this summary report, the Region of Peel had not issued a response to Golder. The Region of Peel should be contacted following confirmation of property acquisition requirements for specific properties requiring acquisition.

### 3.10 EcoLog ERIS Search of Environmental Databases

Golder contracted EcoLog Environmental Risk Information Services Ltd. ("EcoLog ERIS") to search select available provincial and private-sector environmental databases for the study area, including the following:

- Anderson's Waste Disposal Sites;
- Retail Fuel Storage Tanks;
- Anderson's Storage Tanks;
- Automobile Wrecking & Supplies;
- Chemical Register;
- Fuel Storage Tank – Historic;
- Private and Retail Fuel Storage Tanks;
- Landfill Inventory Management Ontario;
- Ontario Regulation 347 Waste Generators Summary;
- Pesticide Register;
- Commercial Fuel Oil Tanks;
- Ontario Regulation 347 Waste Receivers Summary;
- Waste Disposal Sites - MOE CA Inventory;
- Inventory of PCB Storage Sites;
- Waste Disposal Sites - MOE 1991 Historical Approval Inventory; and,
- Fuel Storage Tank.

The complete database report is included in Appendix B. Noteworthy findings of the EcoLog ERIS report are summarized in Table 1 below.

### 3.11 Aerial Photographs and Existing Conditions

Aerial photographs of the study area (or portions thereof) and vicinity were obtained from York Region Interactive Mapping and Mississauga Interactive Mapping and reviewed for the years 1954, 1970, 1988/89 and 1995. 2005 and 2013 aerial photographs were obtained from Google Earth™. It should be noted that due to the small scale of the aerial photographs, some structure details could not be determined. The aerial photographs, provided by York Region and Mississauga Interactive Mapping online resources (1954, 1970, 1988/89 and 1995) and the 2004 Google Earth™ image are provided on Figures 3A to 3E, respectively (Appendix D). According to the 2013 Google Earth™ aerial imagery (Figures 1 and 2) and the site reconnaissance, the current conditions of the study area are as follows:

#### ***West of Hurontario Street to Hurontario Street***

##### **North Side**

This area is mainly under residential land use.

##### **South Side**

This area is undeveloped with the exception of a Hydro/Utility corridor.

#### ***Hurontario Street to Highway 410***

##### **North Side**

This area is mainly under residential land use. A golf course (Brampton Golf Club) is present along Kennedy Road.

##### **South Side**

This area is undeveloped with the exception of a Hydro/Utility corridor.

#### ***Highway 410 to Bramalea Road***

##### **North Side**

This area is mainly under industrial/commercial use. The Bramalea GO Station is present just south of Steeles Avenue West on Bramalea Road. An Industrial warehousing and courier facility is located east of Highway 410. A Coca Cola Bottling facility is present at Tomken Road just north of 407 ETR. Mas Metal Welding Contractors is located east of Dixie Road. A transport group (Euro Transportation) is located west of Bramalea Road. Stirling Chemicals and an auto repair facility are present at 211 Wilkinson Road. Industrial Paint Coatings is present at 509 Advance Boulevard. Various auto service stations are present along Alfred Kuehne Boulevard.

##### **South Side**

This area is mainly vacant or under agricultural land use. A Hydro/Utility corridor is present. Algonquin Power Systems and Emerald Energy from Waste facility is present at the southwest corner of the Bramalea Road exit off 407 ETR.

#### ***Bramalea Road to Airport Road***

##### **North Side**

This area is mainly under industrial land use with some commercial land use. The Canadian Tire/Good Year Tire Distribution Centre is present just east of Bramalea Road. Go Transit railway tracks run north/south between Bramalea Road and Torbram Road. Plasti-Parts Mold is located west of Torbram Road. Garment and Linen Dry Cleaning and Laundering is present at the southeast corner of Torbram Road and Steeles Avenue East. Several auto service stations area present along Melanie Drive.

### **South Side**

This area is mainly undeveloped with some commercial/industrial development present, just east of Bramalea Road. A Hydro/Utility corridor is present. The Hilton Garden Inn is located at the northwest corner of Airport Road and Steeles Avenue East. Peel Integrated Waste Management facility is present at 7795 Torbram Road.

### ***Airport Road to Gorewood Drive/Finch Avenue West***

#### **North Side**

This area is industrial with a Metal Recycling Facility (Triple M Metal LP Metal Recycling) and Industrial Cold Storage facility located on Intermodal Drive. A Hydro/Utility corridor from south of ETR 407 moves in a northerly direction northeast of Goreway Drive.

#### **South Side**

This area is primarily undeveloped land with some industrial development just east of Airport Road and along Steeles Avenue East. A Hydro/Utility corridor is present. CNR tracks run north/south at the midway point between Goreway Drive and Airport Road.

### ***Gorewood Drive/Finch Avenue West to Martin Grove Road***

#### **North Side**

This area is undeveloped with the exception of Gracious Living, Plastics Manufacturing located just west of Martin Grove Road. A Hydro/Utility corridor is present.

#### **South Side**

This area is primarily undeveloped with the exception of the 407 Construction Company located east of Highway 427 and north of Steeles Avenue West, a commercial/industrial area located west of Highway 427 and south of Steeles Avenue West (along Codlin Crescent) was noted to have several truck/equipment repair/storage facilities and a garden centre, and an industrial area was located east of Highway 27 and north of Steeles Avenue West. A CNR corridor is present.

### ***Martin Grove Road to Islington Avenue***

#### **North Side**

This area is either undeveloped or under agricultural land use. Parkland is present just east of Martin Grove Road. CNR and Hydro/Utility corridors are present.

#### **South Side**

This area is undeveloped with the exception of a Hydro/Utility corridor and two intersecting rail tracks.

### ***Islington Avenue to East of Highway 400***

#### **North Side**

Residential development is present west of Pine Valley Drive. East of Pine Valley Drive is primarily industrial development with some commercial and residential. A Hydro/Utility corridor is present west of Islington Avenue.

#### **South Side**

This area is primarily commercial with some industrial. Toronto Star, Vaughan Printer Centre is located between Weston Road and Highway 400. CNR and Hydro/Utility corridors are present.

### 3.11.1 Regional Geology

Surface geology mapping as presented on the Ontario Geological Survey Release, Geological Series “Surficial Geology of Southern Ontario, Ontario Geological Survey” was reviewed by Golder. Based on the geology mapping, the west portion of the Transitway, in the vicinity of 407 ETR and Bramalea Road, crosses fine-textured glaciolacustrine deposits of silt, clay and minor sand and gravel. East of Bramalea Road, the shallow geology is expected to transition to glacial deposits of till, typically relatively fine grained clay to silt textured silt till. Based on the surficial geology of the study area, significant areas of groundwater recharge are not expected within the study area. Groundwater discharge is expected to be limited to the lower elevation stream valley areas in the study area.

Based on the Ministry of Environment and Climate Change Ontario Well Records, water wells have been in use historically throughout the study area, however, given the expansion and use of the urban areas of the Cities of Vaughan, Brampton, Mississauga and Toronto, it is not expected that water wells are in use within the study area. The geology reported in the well records is generally consistent with the published mapping with relatively fine grained clay and till deposits typically reported at ground surface.

### 3.11.2 Existing Land Use

The study area is located generally within the Cities of Brampton and Vaughan. The study area is also located directly adjacent to the City of Mississauga and the City of Toronto and extends slightly within the City of Mississauga and City of Toronto boundaries in a few locations. Land use in the vicinity of the study area was observed to be primarily a mix of undeveloped, residential, industrial, commercial and agricultural land use with some open space, parkland and Hydro/Utility and rail corridors. Some properties are expected to have or to historically have had fuel use and/or storage on-site and vehicle or equipment maintenance.

A summary of the significant findings of the field reconnaissance is presented in Table 1. Locations of properties with issues of potential environmental concern are shown on Figures 1 and 2 (Appendix A). Properties described in Table 1 are reported by address.

## 3.12 Summary of Findings

Based on existing land use information obtained from the information collected to date, there are some properties within the study area which would require further environmental investigation to assess the potential presence of subsurface impacts. Figures 1 and 2 (Appendix A) identify properties which may have environmental impacts to soil and/or groundwater from current or historical activities based on the assessment to date.

The current and/or former occupants of the properties of concern are listed in Table 1. In general, properties currently or historically developed as service garages, gas stations, vehicle sales centres, auto body repair shops, manufacturing facilities, industrial properties, waste management facilities and construction yards represent issues of potential environmental concern and impacts may be encountered during construction activities in the vicinity of these properties. Properties which require further background investigation generally include properties that appear to be vacant or newly occupied, but which had previously been developed for different uses. Any agricultural properties with active farming infrastructure (i.e. barns, sheds, livestock pens) within 50 m of the right-of-way have been identified on Table 1 due to the potential petroleum hydrocarbon, pesticide, and nutrients impacts associated with these operations; however, cultivated fields have not been identified.

If a property is not listed in Table 1, impacts to soil and/or groundwater are not anticipated based on information gathered to date. However, it should be noted that there may be issues of potential environmental concern associated with these properties that were not evident based on the level of assessment carried out as described

in this report. Further, the issues of potential environmental concern identified in Table 1 are preliminary in nature based on the scope of work outlined herein and may not include all issues associated with all properties.

### **Low Risk Ranking:**

- The property is located greater than 200 m from the proposed 407 Transitway construction, however, has a higher potential for contamination issues;
- Environmental impacts are likely limited in extent and likely only present in surficial soil;
- Migration, exposure pathways and receptors are likely limited; and/or,
- Impacts can likely be easily managed prior to or during construction.

### **Moderate Risk Ranking:**

- The property is located directly in, or immediately adjacent to, the proposed 407 Transitway;
- Environmental impacts are likely to be present across a large portion of the property;
- Environmental impacts are likely present in soil and/or groundwater;
- Migration, exposure pathways and/or receptors may be present; and/or,
- Impacts would need to be assessed prior to construction.

### **High Risk Ranking:**

- The property is located directly in, or immediately adjacent to, the proposed 407 Transitway;
- Environmental impacts are likely widespread across the property;
- Environmental impacts are likely present in soil and groundwater;
- Impacts are likely mobile and migrating across, onto and/or off-Site;
- Source of impacts is likely still present;
- There are several receptors and exposure pathways; and/or,
- Impacts would need to be assessed and addressed prior to construction.

## **4.0 SUMMARY AND DISCUSSION**

Table 1 summarizes potential additional environmental assessment programs based on information obtained to date.

Further assessment (e.g. in the form of a preliminary site screening, site visit, Phase I or Phase II ESA) may be required depending on property needs. The properties should be considered on a case by case basis to determine the need for further assessment during project implementation, specifically during property acquisition.

- Risk Ranking - Low: 15 properties would require further assessment to determine whether subsurface investigations would be warranted (i.e. a Phase I ESA is recommended) if the property will be impacted by construction activities;

- Risk Ranking - Moderate: 15 properties would require subsurface investigations to determine presence/absence of impacts (i.e. limited subsurface environmental investigations are recommended) if the property will be impacted by construction activities; and,
- Risk Ranking - High: 4 properties would require subsurface environmental investigations (i.e. Phase II ESAs) to determine whether soil and/or groundwater impacts exist at the properties if the property will be impacted by construction activities.

Not all properties identified in table 1 below will be required to be investigated, however, it is possible that impacts relating to activities at these properties may be encountered during construction (due to migration) and therefore they have been included in this report.

Should impacts be identified during subsequent phases of work, an assessment will be conducted and appropriate steps will be taken following the MTO's Environmental Reference for Highway Design.

**Table 1: Property Identification Summary – Properties with Issues of Potential Environmental Concern**

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Risk Ranking	Comments
1	7155 Hurontario Street, Mississauga	Good Guys Gas Bar, and former Amerco Rentals and U-Haul	Fuel use and storage, BTEX, PHC F1 to F4	Site reconnaissance, city directories, EcoLog ERIS Report	Low	Fuel use and storage and possible historical vehicle storage and maintenance
1A	33 and 111 Topflight Drive, Mississauga	Continental Tire & Auto Repair and Busch Vacuum Technics Inc.	Fuel use and storage, BTEX, PHC F1 to F4, metals, lubricants, VOCs	Site reconnaissance and city directories	Moderate	Fuel use and storage and possible, vehicle and equipment maintenance
2	215-217 Statesman Drive, Mississauga	Commercial and Industrial Machinery and Equipment Repair and Millwright	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	EcoLog ERIS Report	Low	Commercial and industrial machinery and equipment repair
3	7385 Farmhouse Court, Mississauga	Furrow Systems International Ltd.	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	EcoLog ERIS Report	Moderate	Fuel use and storage and possible, vehicle and equipment maintenance
4	15 West Creek Boulevard, Brampton	Coca Cola Bottling Company	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	Aerial Photographs, Brampton interactive mapping	Low	Possible environmental impact from on-site industrial processes
5	7635 to 7655 Tranmere Drive, Mississauga	Industrial Use – several waste generators	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	EcoLog ERIS Report	Moderate	Numerous Registered Waste Generators

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Risk Ranking	Comments
6	26 Westwyn Court, Brampton	Mas Metal Welding Contractors, Stirling Chemicals and A1 City Auto Repair	Fuel use and storage, BTEX, PHC F1 to F4, metals, lubricants, VOCs	Aerial Photographs, Brampton interactive mapping	Low	Vehicle parts sales, metal welding contractors and chemical manufacturing facility.
7	193 Advance Boulevard, Brampton	Industrial Paint Coatings and Promotive Service Center	VOCs, Metals, BTEX, PHC F1 to F4, Fuel use and storage, lubricants	Aerial Photographs, Brampton interactive mapping	Low	Possible environmental impact from on-site industrial processes
8	197 Advance Boulevard, Brampton	Commercial and Industrial including MG Manufacturing	PHC F1 to F4, BTEX, metals, inorganics, VOCs	Aerial Photographs, Brampton interactive mapping and Site visit observations	Low	Possible environmental impact from on-site industrial processes
9	3 Alfred Keuhne Boulevard, Brampton	Kalas Truck Repair and SS Auto and Muffler Repair	PHC F1 to F4, BTEX, metals, inorganics, VOCs	Aerial Photographs, Brampton interactive mapping	Low	Possible environmental impact from on-site industrial processes
11	7656 Bramalea Road, Brampton	Emerald Energy from Waste/Algonquin Power Energy From Waste	PHC F1 to F4, BTEX, metals, inorganics, VOCs	Aerial Photographs, Brampton interactive mapping, Site observations, EcoLog ERIS Report	Moderate	Gasification units, thermal energy from waste
12	7653 Bramalea Road, Brampton	DEL Industrial Metals	PHC F1 to F4, BTEX, metals, inorganics, VOCs, PAHs	Site visit observations	Moderate	Metal Manufacturing, Likely Solvent Use

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Risk Ranking	Comments
13	7655 Bramalea Road, Brampton	Massiv Die-Form	PHC F1 to F4, BTEX, metals, inorganics, VOCs, PAHs	Site visit observations, EcoLog ERIS Report	Moderate	Automotive Manufacturing, Waste generators
14	22 Melanie Drive, Brampton	Plasti-parts and molds	BTEX, PHC F1 to F4, VOC, inorganics	Aerial Photographs, Brampton interactive mapping	Low	Plastics manufacturing facility
15	7795 Torbram Road, Brampton	Peel Integrated Waste Management Facility	PHC F1 to F4, BTEX, metals, inorganics, VOCs	Aerial Photographs, Brampton interactive mapping	Low	Waste management facility.
16	2565 Steeles Avenue East, Brampton	Historical garment and Linen Service Dry Cleaning/Launderer, old gas station	BTEX, PHC F1 to F4, Metals, VOCs	Aerial Photographs, Brampton interactive mapping, Site visit observations	High	Dry cleaning operations
18	80 Walker Drive, Brampton	Commercial and Industrial - Tank Farm	PHC F1 to F4, BTEX, metals, VOCs	Site visit observations	Low	Tank farm
19	2625 Steeles Avenue, Brampton	Regional Municipality of Peel	Metals, inorganics	EcoLog ERIS Report	Moderate	Generators of inorganic acid waste from 2014 to 2016
21	Parkhurst Square, Brampton	Industrial Area – several waste generators	PHC F1 to F4, BTEX, metals, VOCs, PCBs	EcoLog ERIS Report	Moderate	Industrial

Property I.D. (see Figure A)	Site Address	Occupant	Potential Contaminants/ Issues of Concern *	Source	Risk Ranking	Comments
21A	2645 Steeles Avenue East, Brampton/8003 Airport Road, Brampton	Esso Gas Station/Historical Gas Stations/Car Wash (both north and south of Steeles Avenue East)	BTEX, PHC F1 to F4, Metals, VOCs	City directories, EcoLog ERIS Report	High	Fuel use and storage
22	331 Intermodal Drive, Brampton	Triple M Metal LP	BTEX, PHC F1 to F4, Metals, VOCs	Aerial Photographs, Brampton interactive mapping	Low	Metal recycling operations
25	Kenview Boulevard, Finch Avenue, and Steeles Avenue West, Brampton	Industrial - Hydraulic oil	PHC F1 to F4, BTEX,	Site visit observations	Moderate	Hydraulic oil observed
27	2010 to 2200 Codlin Crescent, Brampton	Several truck/equipment repair/storage facilities and a garden centre	PHC F1 to F4, BTEX, metals, inorganics, VOCs, PAH	Previous Reports, EcoLog ERIS	High	Truck/equipment repair/storage facilities

\* Preliminary issues based on the level of study carried out. Additional issues may be identified based on subsequent, more detailed, levels of study (Phase I ESA)

## 5.0 EXCESS MATERIAL MANAGEMENT

As per MTO objectives, to the extent possible, this project should strive for zero waste generation. Where recommendations for re-use of materials are made below, it should be noted that these recommendations are made from an environmental perspective only. The geotechnical and structural implications of the re-use of materials should be reviewed by individuals with the appropriate expertise in those areas.

Based on the review of the study area, wastes that may be generated by the project could consist of:

- Reclaimed asphalt pavement (“RAP”) from milling of existing asphalt surfaces;
- Concrete, likely reinforced, from the removal of bridge or pavement structures;
- Manufactured wood waste from guide rails and the like removals; and,
- Scrap metal such as wire, corrugated steel pipe, and bridge guide rails.

RAP can be re-used on site for a variety of purposes as part of the construction activities, including, but not necessarily limited to, shoulder treatments, general fill and sub-grade fill. Non-reinforced concrete can be broken up and re-used within the project limits. Manufactured wood waste will require off-site disposal at licensed receiving facilities. Natural wood waste may be left on site within the right-of-way. Scrap metal should be collected for recycling at an off-site receiving facility.

## 6.0 LIMITATIONS AND USE OF REPORT

This report was prepared for the exclusive use of LGL Limited and the MTO. This report is based on preliminary and limited historical information and geological data obtained by Golder as described in this report. This study was completed on a regional scale through a review of existing available information and did not consist of site specific assessments. Additional issues of potential environmental concern may be identified upon completion of site specific Phase I and II Environmental Site Assessments (“ESAs”).

This report is not intended to be utilized as supporting documentation for a Record of Site Condition under Ontario Regulation 153/04. If a Record of Site Condition is required for the properties within the study area and this report is to be used as part of the supporting documentation, it must be reviewed and updated by Golder. Additional environmental site assessment activities would be required to comply with Ontario Regulation 153/04.

We accept no responsibility for any deficiency, misstatements or inaccuracies contained in this report as a result of omission, misinterpretations or fraudulent acts of the persons contacted or contained in the information obtained as part of this work. Golder accepts no responsibility for any reduction in property value, either real or perceived, as a result of the reporting of factual information herein.

It should be noted that the results of an investigation of this nature should, in no way, be construed as a warranty that the study area is free from any and all contamination from past or current practices. This assessment was carried out using existing historical information as available from various agencies and no assurance is made regarding the accuracy or completeness of this information. No sampling of soil, groundwater, air emissions or gas was conducted.

If new information is discovered during future work, including excavations, borings or other studies, Golder Associates Ltd. should be requested to re-evaluate the conclusions presented in this report and to provide amendments as required.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

<b>Area (Ha):</b>		37.17		
<b>Landfill Type:</b>		sanitary landfill		
<b>Group Name:</b>		Humber River		
<b>Operated By:</b>		Metro Toronto		
<b>Serial:</b>		YKR31 1974		
<b>NTS:</b>		30M13		
<b>Diameter (m):</b>				
<b>Historical Summary:</b>				
<p>S Thackeray Dump 1974 1974 Air Photos Active dump marked 37.17 HA (via MapInfo) [Northway Survey Corp. 1974 Air Photos YUML: G3524 T6 A4 4 1974]. 1978 NTS Map Within area of active dumping marked [1978 NTS 1:50,000 map Brampton ON Sheet 30M13 Edition 5]. Metro Works Committee recommends that Metro ban private contractors from using Metro dumps to save capacity (Toronto Star Feb 21 1973). Metro Toronto plans to shut private waste haulers out of South Thackeray dump from October 31 ([Toronto] Globe &amp; Mail Mar 3 1973). The industrial waste haulers of Toronto have expressed a formal protest to Metro over the decision to shut them out of the Thackeray Dump (which will close in 1974) and send them instead to Beare Rd (to close in 1977). The new arrangements will cost more they complain ([Toronto] Globe &amp; Mail Oct 30 1973). Brampton's old dump in Caledon, on the Victoria Side Road saw a 60% increase in dumping from November 1973 when the Thackeray dump site closed in Metro (Toronto Star Mar 6 1974).</p>

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2016**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Nov 2016**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-May 2017**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2014**

### **Certificates of Approval:**

Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Commercial Fuel Oil Tanks:**

Provincial [CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

**Government Publication Date: Feb 28, 2017**

**Chemical Register:**

Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-May 2017**

**Compressed Natural Gas Stations:**

Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 31, 2012**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2017**

**Certificates of Property Use:**

Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Aug 2017**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886-Aug 2015**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Mar 2017**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Aug 2017**

**Environmental Compliance Approval:**

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Mar 2017**

**Environmental Effects Monitoring:**

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Aug 2016**

**Environmental Issues Inventory System:**

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**List of TSSA Expired Facilities:**

Provincial **EXP**

List of facilities with removed tanks which were once registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed automatically fall under the expired facilities inventory held by TSSA.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-Mar 2017**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sept 2003**

**Fuel Storage Tank:**

Provincial **FST**

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jun 2017**

**Greenhouse Gas Emissions from Large Facilities:**

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2015**

**TSSA Historic Incidents:**

Provincial **HINC**

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**TSSA Incidents:**

Provincial **INC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Dec 31, 2013**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2017**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2014**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Aug 2010**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008 - Dec 2016**

**National Energy Board Wells:**

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

**NEES**

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

**NPCB**

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

**NPRI**

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-2014**

**Oil and Gas Wells:**

Private

**OGW**

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 2017**

**Ontario Oil and Gas Wells:**

Provincial

**OOGW**

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Oct 2016**

**Inventory of PCB Storage Sites:**

Provincial

**OPCB**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

**ORD**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Aug 2017**

**Canadian Pulp and Paper:**

Private

**PAP**

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009**

**Parks Canada Fuel Storage Tanks:**

Federal

**PCFT**

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: 1988-Oct 2016**

**TSSA Pipeline Incidents:**

Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Aug 2017**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Aug 2017**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-May 2017**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Jun 2017**

**Wastewater Discharger Registration Database:**

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-2014**

**Anderson's Storage Tanks:**

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Jan 2015**

**TSSA Variances for Abandonment of Underground Storage Tanks:**

Provincial **VAR**

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

**Government Publication Date: Feb 28, 2017**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial **WDS**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Mar 31, 2017**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Mar 31, 2017**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## Groves, Christi

---

**From:** Public Information Services <publicinformationsservices@tssa.org>  
**Sent:** September-19-17 11:19 AM  
**To:** Groves, Christi  
**Subject:** RE: records search - 1525717

Hello Christi,

Thank you for your inquiry.

I have searched the below noted address (addresses) and I have located the following record:

- 7656 Bramalea Road, Brampton, Ontario: 1 active liquid fuel tank and 1 active private fuel outlet.
- **2010 to 2220 Codlin Crescent, Brampton, Ontario: Please note that we do not search ranges. Please provide specific municipal addresses**

For a more detailed report including underground fuel storage tank details and copies of all inspection reports, please submit your request in writing to Public Information Services via e-mail ([publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org)) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a cheque made payable to TSSA.

Thank you and have a great day,

Sherees

Attention: Ms. Christi Groves

**Re: Phase One Environmental Site Assessment  
Project No. 1525717**

A review of files within the Environmental Monitoring and Enforcement unit has been completed for information regarding the following locations:

- 6200 Steeles Avenue West, Vaughan
- 6300 Steeles Avenue West, Vaughan
- 5690 Steeles Avenue West, Vaughan
- 100 Galcat Drive, Vaughan
- 200 Galcat Drive, Vaughan

Currently we have no information on file regarding any Sewer Use Bylaw infractions, chemical spills or dewatering activities at any of these sites.

Additionally, a review of files within Water Resources Group showed that these properties are not in a Wellhead Protection Area, nor are these properties in a significant groundwater recharge area. Also, these properties are not in a Highly Vulnerable Aquifer. These properties are not on the Oak Ridges Moraine, and are not in an Aquifer of High Vulnerability Area on the Moraine as defined in the Oak Ridges Moraine Conservation Plan. Further, these properties are not in a Recharge Management Area.

Please be advised that York Region does not provide information regarding closed landfill sites.

I trust that this information meets with your requirements.

Sincerely,

A handwritten signature in blue ink that reads "Mark Payne". The signature is written in a cursive style with a large initial "M".
