Table 5.5d: WHITES ROAD STATION - Proposed SWMF-5 - Design Parameters

Pond Catchment Area 3.46 ha

Water Quality Storage Requirements

MOECC (2003, Table 3.2)

Level 1	265 m^3/ha	Interpolated from Table 3.2 (MOECC)		
Extended	40 m^3/ha	(or 25mm rainfall event whichever greater)	*138.40*	m^3
25 mm Event From OTTHYMO	18.08 mm		*625.57*	m^3
% imperviousness	90 %			
Permanent Volume Required			*778.50*	m^3

Quantity Control Required

Total Volume required up to and including the 100 yr storm **2,145.20** m^3

Total Pond Volume Required (Permanent and Extended) **2,923.70** m^3

Settling Calculations MOECC Eq. 4.5

$$Dist = \sqrt{\frac{r \times Q_p}{V_s}}$$

Dist	6	Minimum Forebay length	m
r	1.55	Length to width ratio	-
Qp	0.007	Peak flow rate from the pond during design quality storm	m^3/s
Vs	0.0003	settling velocity'	m/s

Dispersion Length MOECC Eq. 4.6

$$Dist = \frac{8Q}{dV_f}$$

Minimum Width 2 m

Dist	12	Minimum Dispersion Length	
Q	0.57	Inlet Flow Rate	(5 year Storm)
d	2.5	Depth of the Permanent Pool	
Vf	0.15	Desired Velocity in the Forebay	

(0.15 m/s is the maximum permissible velocity before erosion occurs in a channel (MOECC))

Minimum Forebay Deep Zone Bottom Width MOECC Eq. 4.7

Width = Dist/8 Width 0.75 m

Design Quality Storm MOECC Eq 4.9

$$i_{25} = 43C + 5.9$$

A	3.46	Area	
C	90	Runoff Coefficient	
i	44.6	Intensity	mm/hr
Qp	0.39	Flow Rational Method	

Flow Velocity Check

Qd	0.57	Inlet Flow Rate	m^3/s
A	31.35	Crossectional Area	m^2
Vfb	0.018	Flow Velocity	m/s

Table 5.7d: BROCK ROAD STATION - Proposed SWMF-7 - Design Parameters

Pond Catchment Area 9.06 ha

Water Quality Storage Requirements

MOECC (2003, Table 3.2)

Level 1	265	m^3/ha	Interpolated from Table 3.2 (MOECC)		
Extended	40	m^3/ha	(or 25mm rainfall event whichever greater)	*362.40*	m^3
25 mm Event From OTTHYMO	18.88	mm		*1,710.53*	m^3
% imperviousness	90	%			
Permanent Volume Required				*2,038.50*	m^3

Quantity Control Required

Total Volume required up to and including the 100 yr storm **5,209.50** m^3

Total Pond Volume Required (Permanent and Extended) **7,248.00** m^3

Settling Calculations MOECC Eq. 4.5

$$Dist = \sqrt{\frac{r \times Q_p}{V_s}}$$

Dist	8	Minimum Forebay length	m
r	1.89	Length to width ratio	-
Qp	0.01	Peak flow rate from the pond during design quality storm	m^3/s
Vs	0.0003	settling velocity'	m/s

Dispersion Length MOECC Eq. 4.6

$$Dist = \frac{8Q}{dV_f}$$

Minimum Width 2 m

Dist	14	Minimum Dispersion Length	
Q	0.56	Inlet Flow Rate	(5 year Storm)
d	2.2	Depth of the Permanent Pool	
Vf	0.15	Desired Velocity in the Forebay	

(0.15 m/s is the maximum permissible velocity before erosion occurs in a channel (MOECC))

Minimum Forebay Deep Zone Bottom Width MOECC Eq. 4.7

Width = Dist/8 Width 0.99 m

Design Quality Storm MOECC Eq 4.9

$$i_{25} = 43C + 5.9$$

A	9.06	Area	
C	90	Runoff Coefficient	
i	44.6	Intensity mm/hr	
Qp	0.45	Flow Rational Method	< OTTHYMO = USE OTTHYMO

Flow Velocity Check

Qd	0.56	Inlet Flow Rate	m^3/s
A	32.88	Crossectional Area	m^2
Vfb	0.017	Flow Velocity	m/s
	Yes	< 0.15	

Forebay Dimensions

4:1	Average Side Slope	%
34.09	Top Length	m
23.54	Bottom Length	m
20.20	Average Top Width	m
10.24	Bottom Width	m
2.16	Average Depth of the Pool	m
991.21	Approximate Volume of the Pool	m^3
3089.57	Total Permanent Pool Volume	m^3
0.32	Forebay/Total Volume Ratio	
686.05	Forebay Area	m^2
2330.44	Total Permanent Pool Area	
0.29	Forebay/Total Area Ratio	
1.89	Average L/W Ratio Check	

Forebay Cleanout Frequency

Ac	9.06	Contributing Area	(ha)
Ds	0.6	Maximum Sediment Depth	(m)
Vsf	295	Maximum Sediment Volume	(m^3)
a	30%	Impervious Level	%
da	0.6	Annual Sediment Loading	(m^3/ha/yr) (Table 6.3 MOECC Manual)
Fs	54.3	Forebay Cleanout Frequency	(years)
	75%	Target Maintenance TSS Removal Efficiency	

Table 5.7e: BROCK ROAD STATION - Proposed SWMF 7 - Stage-Storage, Stage-Discharge Relationships and Outlet Structure Design

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/7/2016 12:16:59 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 57
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p57

Geometry Title: WC3-EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g09

Flow Title : WC#3 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f02

Plan Summary Information:
Number of: Cross Sections = 5 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

C & E Loss (m)	0.01	Cum SA (1000 m2)	1.01	2.48	0.02

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The cross-section end points had to be extended vertically for the computed water surface.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/7/2016 1:09:05 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 57
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p57

Geometry Title: WC3-PROP (3 x 1.25)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g05

Flow Title : WC#3 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f02

Plan Summary Information:
Number of: Cross Sections = 5 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#3 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f02

C & E Loss (m)	0.04	Cum SA (1000 m2)		1.80	

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.

Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started from
scratch

PLAN DATA

Plan Title: Plan 02
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p02

Geometry Title: WC4-EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g10

Flow Title : WC#4 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f03

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#4 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f03

C & E Loss (m)	0.01	Cum SA (1000 m2)	0.74	4.91	0.20	

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: Divided flow computed for this cross-section.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: Divided flow computed for this cross-section.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/7/2016 1:27:41 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 58
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p58

Geometry Title: WC4-PROP (3 x 1.25)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g29

Flow Title : WC#4 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f03

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#4 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f03

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: Divided flow computed for this cross-section.
Warning: The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/23/2016 2:40:46 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 47
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p47

Geometry Title: WC5-EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g11

Flow Title : WC#5 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f04

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/23/2016 2:45:16 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 48
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p48

Geometry Title: WC5-PROP (3 x 1.25)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g30

Flow Title : WC#5 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f04

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#5 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f04

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. Most likely, the downstream cross section blocks part of the culvert or the ineffective area is set too far in. Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.

Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.
Note: During subcritical analysis, the culvert direct step method, the solution went to normal depth.

Culv Crt Depth (m)	0.38	Min El Weir Flow (m)	182.20

Warning: During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. Most likely, the downstream cross section blocks part of the culvert or the ineffective area is set too far in. Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 1/19/2016 3:10:28 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started from
scratch

PLAN DATA

Plan Title: Plan 06
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p06

Geometry Title: WC11 (EX)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g01

Flow Title : WC 11-4hr Chicago
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f11

Plan Summary Information:
Number of: Cross Sections = 3 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth
for the water surface and continued on with the calculations.

Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/7/2016 2:06:29 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 60
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p60

Geometry Title: WC11 (PROP)-OPT4
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g12

Flow Title : WC 11-4hr Chicago
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f11

Plan Summary Information:
Number of: Cross Sections = 3 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC 11-4hr Chicago
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f11

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.

Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 1/19/2016 3:11:56 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started from
scratch

PLAN DATA

Plan Title: Plan 08
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p08

Geometry Title: WC12 (EX)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g13

Flow Title : WC12-4hr Chicago
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f12

Plan Summary Information:
Number of: Cross Sections = 3 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC12-4hr Chicago
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f12

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/7/2016 2:20:47 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 61
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p61

Geometry Title: WC12 (PROP)-OPT6
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g14

Flow Title : WC12-4hr Chicago
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f12

Plan Summary Information:
Number of: Cross Sections = 3 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC12-4hr Chicago

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate

the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/19/2016 1:56:17 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 38
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p38

Geometry Title: WC15A-EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g19

Flow Title : WC#15A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f05

Plan Summary Information:
Number of: Cross Sections = 2 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.003
Critical depth calculation tolerance = 0.003
Maximum number of iterations = 20
Maximum difference tolerance = 0.1
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#15A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f05

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/19/2016 1:59:23 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 39
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p39

Geometry Title: WC15A - PROP (6 x 1)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g07

Flow Title : WC#15A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f05

Plan Summary Information:
Number of: Cross Sections = 2 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.003
Critical depth calculation tolerance = 0.003
Maximum number of iterations = 20
Maximum difference tolerance = 0.1
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#15A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f05

Warning: During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. Most likely, the downstream cross section blocks part of the culvert or the ineffective area is set too far in. Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.
Note: During subcritical analysis, the culvert direct step method, the solution went to normal depth.

Warning: During subcritical analysis, with the exit loss set =1.0, the projected WSEL in culvert has a lower energy than the downstream energy. Most likely, the downstream cross section blocks part of the culvert or the ineffective area is set too far in. Instead of projecting the WSEL, the program did an energy balance to get the WSEL inside the culvert at the downstream end.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 21/01/2016 2:06:25 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 31
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p31

Geometry Title: WC16 - EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g08

Flow Title   : WC#16-Chicago4hr (PARSONS)
Flow File   : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f15

Plan Summary Information:
Number of: Cross Sections =   8   Multiple Openings =   0
            Culverts   =   0   Inline Structures =   0
            Bridges   =   0   Lateral Structures =   0

Computational Information
    Water surface calculation tolerance = 0.01
    Critical depth calculation tolerance = 0.01
    Maximum number of iterations   = 20
    Maximum difference tolerance   = 0.3
    Flow tolerance factor   = 0.001

Computation Options
    Critical depth computed only where necessary
    Conveyance Calculation Method: At breaks in n values only
    Friction Slope Method: Average Conveyance
    Computational Flow Regime: Subcritical Flow

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: Divided flow computed for this cross-section.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/13/2016 3:16:54 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 31
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p31

Geometry Title: WC16 - PROP Twin Culv (5x2)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g04

Flow Title : WC#16-Chicago4hr (PARSONS)
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f15

Plan Summary Information:
Number of: Cross Sections = 8 Multiple Openings = 0
Culverts = 3 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: Divided flow computed for this cross-section.
Warning: The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 1/20/2016 9:47:06 AM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started from
scratch

PLAN DATA

Plan Title: Plan 16
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p16

Geometry Title: WC19-EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g15

Flow Title : WC#19 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f06

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#19 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f06

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4.
This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/8/2016 9:55:47 AM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 02
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p02

Geometry Title: WC19-PROP (2.5 x 1.25)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g28

Flow Title : WC#19 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f06

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#19 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f06

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/8/2016 10:16:05 AM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 03
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p03

Geometry Title: WC20-EX (407 ETR)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g24

Flow Title : WC#20 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f07

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#20 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f07

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/8/2016 10:24:47 AM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 04
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p04

Geometry Title: WC20-PROP (2 .5 x 1.25) (407 ETR)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g26

Flow Title : WC#20 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f07

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 2 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#20 - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f07

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/8/2016 10:42:59 AM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 05
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p05

Geometry Title: WC20A-EX (407 ETR)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g02

Flow Title : WC#20A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f08

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 1 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 9/8/2016 10:51:23 AM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started
from scratch

PLAN DATA

Plan Title: Plan 06
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p06

Geometry Title: WC20A - PROP (407 ETR) (5 x 2.5)
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g18

Flow Title : WC#20A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f08

Plan Summary Information:
Number of: Cross Sections = 4 Multiple Openings = 0
Culverts = 2 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#20A - Chicago 4hr
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f08

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: The velocity head has changed by more than 0.5 ft (0.15 m). This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.

PROJECT DATA
Project Title: HEC-RAS ROUGE
Project File : HEC.prj
Run Date and Time: 1/19/2016 3:19:58 PM

Project in SI units

Project Description:
HEC-RAS model for creek crossings along the proposed 407 TWY Ph 2 started from
scratch

PLAN DATA

Plan Title: Plan 14
Plan File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.p14

Geometry Title: WC21-EX
Geometry File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.g03

Flow Title : WC#21 - Chicago 4hr (Known WS)
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f10

Plan Summary Information:
Number of: Cross Sections = 3 Multiple Openings = 0
Culverts = 0 Inline Structures = 0
Bridges = 0 Lateral Structures = 0

Computational Information
Water surface calculation tolerance = 0.01
Critical depth calculation tolerance = 0.01
Maximum number of iterations = 20
Maximum difference tolerance = 0.3
Flow tolerance factor = 0.001

Computation Options
Critical depth computed only where necessary
Conveyance Calculation Method: At breaks in n values only
Friction Slope Method: Average Conveyance
Computational Flow Regime: Subcritical Flow

FLOW DATA

Flow Title: WC#21 - Chicago 4hr (Known WS)
Flow File : j:\Division\Water\Projects\MARKHAM\TT4022 - 407TWY Phase 2\DESIGN\HEC-RAS\ROUGE\HEC-RAS ROU\HEC.f10

Warning: The energy equation could not be balanced within the specified number of iterations. The program used critical depth for the water surface and continued on with the calculations.
Warning: Divided flow computed for this cross-section.
Warning: The conveyance ratio (upstream conveyance divided by downstream conveyance) is less than 0.7 or greater than 1.4. This may indicate the need for additional cross sections.
Warning: The energy loss was greater than 1.0 ft (0.3 m). between the current and previous cross section. This may indicate the need for additional cross sections.
Warning: During the standard step iterations, when the assumed water surface was set equal to critical depth, the calculated water surface came back below critical depth. This indicates that there is not a valid subcritical answer. The program defaulted to critical depth.
